

Shaikh Hajisab

Machine Learning Engineer — AI Engineer

Pune, India — +91 8999921587 — hajisk89999@gmail.com — LinkedIn — GitHub

PROFESSIONAL SUMMARY

AI & Machine Learning Engineer experienced in building end-to-end ML pipelines, RAG-based AI systems, and production-ready ML applications. Proficient in deep learning, NLP, and deploying scalable ML models via REST APIs. Strong foundation in data preprocessing, feature engineering, and predictive modeling. Demonstrated strong analytical and problem-solving ability by solving 500+ Data Structures and Algorithms problems.

TECHNICAL SKILLS

Programming: Python, SQL, C++

Machine Learning: Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Ensemble Methods

Deep Learning: TensorFlow, Keras, CNN, RNN, LSTM

NLP & Generative AI: Text Processing, TF-IDF, Word2Vec, Sentiment Analysis, RAG Pipelines, LangChain, Prompt Engineering, Vector Databases

Deployment: FastAPI, Flask, REST APIs, Docker, Model Serving, Inference Pipelines

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly

Cloud & DevOps: Oracle Cloud Infrastructure, Git, GitHub

Visualization: Power BI, Excel

PROFESSIONAL EXPERIENCE

Python Developer Intern Technohacks Solutions Pvt. Ltd.

Dec 2024 – Jan 2025

- Engineered ML prediction services via Flask REST APIs enabling real-time inference workflows with high availability.
- Integrated ML prediction services with frontend applications for real-time analytics delivery.
- Collaborated with teams to deploy production-ready machine learning solutions.

PROJECTS

GenAI RAG Intelligent Assistant

GitHub

- Built Retrieval-Augmented Generation assistant processing 1000+ documents achieving 92% answer accuracy.
- Implemented embeddings generation and vector retrieval pipelines for contextual semantic search.
- Integrated retrieval workflows with LLM responses reducing hallucination by 65%.
- Deployed APIs handling 100+ queries per minute with sub-2 second latency.

Accident Risk Analysis System

GitHub

- Developed ML models predicting accident risk achieving 87% accuracy using 50k+ traffic datasets.
- Applied feature engineering and hyperparameter tuning improving baseline performance by 15%.
- Built dashboards visualizing accident hotspots across 20+ cities.
- Optimized ensemble models reducing false positives by 22%.

Product Review Sentiment Analysis

GitHub

- Developed NLP sentiment classifier achieving 89% F1-score on large product review datasets.
- Applied preprocessing techniques improving classification accuracy by 12%.
- Evaluated multiple ML models and selected optimal performance pipeline.

EDUCATION

Dr. D.Y. Patil Institute of Technology

Pune, India

Bachelor of Engineering in Artificial Intelligence and Data Science

2022 – 2026

- CGPA: 9.16/10.0 (Top 5% of class)
- Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Data Structures

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Data Science Professional

Career Essentials in Generative AI Microsoft & LinkedIn

Generative AI Fundamentals LinkedIn Learning

Machine Learning For All Coursera
